Compare it

Why it's so good	Features	
The F305's motion sensor lets you take motion-sensitive gaming with you wherever you go. Add stereo speakers and dedicated gaming keys for a true gaming experience.	Motion sensor 2", 176 x 220 pixel 262K TFT screen 2 megapixel camera A2DP Bluetooth®	Stereo speakers Quadband GSM 10MB memory M2™ support expandable up to 4GB

	Nokia 3500 Classic	Nokia 5310 XpressMusic	Nokia 6300	Samsung L760
How they compare to F305	1.8", 128 x 160 pixel resolution 8.5MB memory No A2DP Bluetooth® support	No stereo speakers Triband GSM No A2DP Bluetooth® support	No Java™ games Triband GSM 1.8" screen	MicroSD slot – expandable up to 2GB Triband GSM
And, none of them have	Motion games, Gaming keys			

Demonstrate it

Motion sensor & horizontal gaming mode

1. Select any motion game and show the customer how he/she can control the game by moving the handset.
2. Highlight how the horizontal mode allows for a more natural fit for the hand.

Stereo speakers

1. Load any game and let the customer experience the sound quality of the speakers.
2. Explain how the great sound will enhance the gaming experience.
3. Or, share music through the stereo speakers.
